# GCB95F CRY BABY® CLASSIC WAH WAH

## POWER

The Cry Baby® Classic Wah Wah is powered by one 9-volt battery (accessed via the bottom of the pedal), an AC adapter such as the Dunlop ECB003/ECB003E, or a DC Brick™ power supply.

## SETUP INSTRUCTIONS

- Run an instrument cable from your guitar to the GCB95F's INSTRUMENT jack and run another instrument cable from the GCB95F's AMPLIFIER jack to your amp.
- To turn the pedal on/off, push the toe of the pedal down until you feel a "click."
- By rocking your foot back and forth on the pedal, you can change the effect that the Classic Cry Baby Wah Wah has on the tone of your instrument instantaneously.
