GEISHA DRIVE

LIKE BUTTER & LIGHTNING!

The Geisha Drive is a special edition of the Way Huge Drive. Limited to 40 pieces, each pedal has been assembled, dated, serial numbered, and signed by George Tripps' own hand. The housing features colorful artwork with Japanese writing from the early prototype stage.

External Controls

- 1** VOLUME sets output level
- 2** DRIVE unleashes copious amounts of overdrive and fuzz gain
- 3** TONE adjusts from warm to bright
- 4** FOOTSWITCH toggles the effect on/bypass
(Blue LED indicates effect is on)

POWER

The Way Huge® Geisha Drive is powered by a single 9-volt battery, a 9-volt AC adapter such as the Dunlop ECB003, or the DC Brick™ and Iso-Brick™ power supplies. The power input is a 5.5mm x 2.1mm jack with the positive voltage on the outer sleeve. Using an external power supply will disconnect the battery. Disconnect the input jack to preserve battery life when not in use. The pedal will lock into bypass mode when it is time to change the battery. It also includes power protection circuitry to prevent damage from AC power supplies.

Specifications

Input Impedance	> 42 k Ω
Output Impedance	< 50 k Ω
Noise Floor	-80 dBV
Bypass	True Hardwire Relay
Dimensions	5" x 3-1/4" x 2-1/2"
Weight	12.2 oz
Current Draw	1.8 mA
Power Supply	9 volts DC

All measurements made at 1 kHz, with controls at mid-position.
